

work law

Preface:

The work law arose and developed with the development of social and economic life, in view of man's view of work as a social and human value that has its valuable place in the life of society as it is one of the means to meet the daily needs of man and as one of the pillars on which the national economy of the state is based, in front of the development of the idea of work It was necessary to intervene to regulate work relations between workers and employers, in order to guarantee and protect each of them, given that the work relationship is a contractual relationship governed by the principle of will power, which is the philosophical source of the principle of freedom in contracting:

The first axis: the nature of the work law and the stages of its development
